

NOTICE TO MARINERS

№85 – 2023

PORT OF LIVERPOOL

INSTALLATION OF FENDERS – NORTH GLADSTONE BRANCH DOCK №1

NOTICE IS HEREBY GIVEN that work has commenced on the installation of fixed fenders at North Gladstone Branch Dock №1.

This work is being undertaken from a 1.2m wide work platform attached to the quay face. The platform is moved as required to each fender installation position. When in situ, the platform sits behind the line of both the current Yokohama-type fenders and the fixed fenders, both of which provide a berthing line that is 2m off the quay face.

The work platform will be cleared of personnel whilst vessels are arriving at or departing from berths within Gladstone Branch Dock №1. During the hours of darkness, two amber flashing lights will be exhibited from the work platform to mark its location.

Vessels manoeuvring within Gladstone Branch Dock №1 must do so with care and caution. Furthermore, vessels passing the entrance to this branch dock must proceed at a speed that minimizes the propagation of wash into the branch dock.

This Notice will remain in force until completion of the fendering work.
